The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-7, 9-17, 19-31, 39-46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. New independent claims 45 and 46 recite comparing one of a fluid property and a current information to the other to determine the operating condition of the system or compressor. However the specification does not disclose such comparing of a fluid property and a current information to the other to determine the operating condition of the system or compressor.
